1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Claims 2-9, 11, 12, 16 and 17, comprising a method and apparatus for treating a leach field by causing water to flow into the conduit;

II. Claim 10, comprising a method for treating a leach field by causing water to flow into vertical pipes;

III. Claim 13, comprising a method for treating a leach field by removing water from the septic tank and flowing gas; and

IV. Claims 14 and 15 comprising a method for treating a leach field by flowing air and creating fissures.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic to all four species. However, claim 1 is generic to species I and II, and will be examined if either of these species is elected.

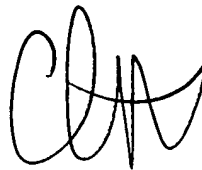

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit ~~1724~~ 3677

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
